

GOVERNANCE

Start Now *Security Check*

Pack

VERSION 1.0

BigCheese 

Detect vulnerabilities before it's too late

In just one month, we perform a comprehensive **security check** of your AWS environment. We activate key tools like **Security Hub and GuardDuty**, apply immediate improvements, and deliver a detailed report with findings, actions taken, and next steps to strengthen your **cloud security strategy**.

What do we do?

- Define your security objectives
- Activate Security Hub and configure GuardDuty
- Implement quick wins
- Deliver a report with findings and solutions
- Train your team in best practices
- Provide a roadmap to strengthen your cloud security

Start your journey

This pack is the **first step** toward continuous, effective **cloud governance** aligned with your real **business risks**.

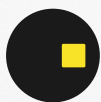

- Solid foundation
- Risk mitigation
- Visible results

Expected Results

- Threats detected (historical average):
 - ✓ Low risk: 30%
 - ✓ Medium risk: 50%
 - ✓ High risk: 20%
- Corrective actions applied without impacting operations
- Clear visibility into current security posture
- Solid foundation for a continuous governance strategy

Business benefits

- Use AWS but lack a clear security strategy
- Need to comply with regulations or audits
- Want to prevent incidents before it's too late
- Have small technical teams and need expert support
- Can't afford the risk of a hack or data breach
- Seek fast results without overloading their team

ABOUT THE PACK

Time and price

Why choose this pack?

- Ideal for organizations on AWS without a clear security strategy
- Helps meet compliance and audit requirements
- Enables early risk detection and mitigation before issues arise
- Provides expert support for small technical teams
- Minimizes legal, operational, and reputational risks
- Delivers visible results in one month, with minimal internal effort

Implementation and Hours

1 month, 40 hours

Regular price (USD)

~~\$3.200~~
